VEDIC BIRTH CHART

Janma Kundali

D1 Lagna and D9 Navamsa charts, planetary positions and houses

Lagna Dhanu · Moon Nakshatra Anuradha

BIRTHPLACE	DATE OF BIRTH	TIME OF BIRTH
New Delhi	**5 September 2038**	**15:20:10**
Delhi (National Capital Territory), India	Local civil date	UTC+05:30 · Asia/Kolkata

SAMPLE REPORT · SYNTHETIC BIRTH DETAILS, NOT A REAL PERSON

A calculation summary of the birth chart. It is not a prediction or professional advice.

SECTION 01

Your Kundali at a glance

The main placements calculated for this birth, followed by a guide to every section. Each value below is repeated with its full precision on the page shown.

D1 LAGNA p. 7	MOON RASHI p. 7	MOON NAKSHATRA p. 7
Dhanu	**Vrischika**	**Anuradha**
20°34′12″ within the Rashi	9°51′51″ · D1 house 12	Pada 2 of 4

SUN RASHI p. 7	D9 LAGNA p. 6	CALCULATION p. 10
Simha	**Tula**	**Lahiri sidereal**
18°33′44″ · D1 house 9	Navamsa house 1	Whole-sign houses · mean Rahu

In this report

01 **Overview** — Key placements at a glance and the contents of this report — 2

02 **Reading guide** — Terms, abbreviations and how longitudes are written — 3

03 **Birth details** — Birth record, time conversion and calculation context — 4

04 **D1 Lagna chart** — North Indian birth chart with whole-sign houses — 5

05 **D9 Navamsa chart** — North Indian Navamsa chart from the engine D9 data — 6

06 **Planetary positions** — Rashi, house and exact sidereal longitude of each graha — 7

07 **Navamsa placements** — D9 Rashi and D9 house of each graha — 8

08 **House directory** — All twelve houses with their D1 and D9 Rashis and grahas — 9

09 **Methodology** — Conventions, provenance, validation status and licences — 10

SECTION 02

How to read this report

A short reference for the terms used on the following pages. These are definitions of how the report is laid out, not interpretations of the chart.

Rashi	One of the twelve 30° signs of the sidereal zodiac, counted from Mesha (1) to Meena (12).
Graha	A body placed in the chart: Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn, and the lunar nodes Rahu and Ketu.
Lagna	The Rashi rising on the eastern horizon at the birth time and place. It is house 1 and is marked Asc.
D1 chart	The Rashi chart. Each graha is shown in the Rashi it occupies; houses are counted from the Lagna.
D9 chart	The Navamsa divisional chart: each Rashi is divided into nine parts of 3°20′. Placements come from the engine.
Whole-sign house	A house is one whole Rashi. House 1 is the Lagna Rashi, house 2 the next Rashi, and so on.
Nakshatra and Pada	One of 27 equal lunar mansions of 13°20′, each in four Padas. Shown here for the Moon.

ABSOLUTE AND SIGN-RELATIVE LONGITUDE

An absolute sidereal longitude counts from 0° Mesha around the full 360° circle. The sign-relative form names the Rashi and the distance into it. In this chart the Sun is at 138.56236668° absolute, which is 18°33′44″ within Simha (Rashi 5, which begins at 120°). Within-sign values are truncated to whole arc-seconds, never rounded up, so a graha is never shown past the edge of its Rashi.

Rashis

1	Mesha	Aries	7	Tula	Libra
2	Vrishabha	Taurus	8	Vrischika	Scorpio
3	Mithuna	Gemini	9	Dhanu	Sagittarius
4	Karka	Cancer	10	Makara	Capricorn
5	Simha	Leo	11	Kumbha	Aquarius
6	Kanya	Virgo	12	Meena	Pisces

Chart abbreviations

Asc	Lagna	Ju	Jupiter
Su	Sun	Ve	Venus
Mo	Moon	Sa	Saturn
Ma	Mars	Ra	Rahu
Me	Mercury	Ke	Ketu

English sign names are conventional equivalents for the sidereal Rashis.

SECTION 03

Birth details

The birth record exactly as the chart was calculated. Please check these values against the birth record before reading the charts: every placement depends on them.

BIRTH RECORD

Birthplace
New Delhi

Region and country
Delhi (National Capital Territory), India

Latitude
28.63576° N

Longitude
77.22445° E

Local date
5 September 2038 (2038-09-05)

Local time
15:20:10

Time zone (IANA)
Asia/Kolkata

UTC offset applied
UTC+05:30

Exact UTC instant
2038-09-05 09:50:10 UTC

CALCULATION CONTEXT

Zodiac
Sidereal

Ayanamsa
Lahiri (Chitrapaksha)

Positions
Geocentric, apparent

Lunar nodes
Mean Rahu; Ketu exactly opposite

Houses
Whole-sign, D1 and D9

Ephemeris
Swiss Ephemeris 2.10.03, local files

Ephemeris data
Verified by SHA-256 before calculation

Time zone data
tzdata 2026.5 (IANA 2026e)

Place source
GeoNames 1261481; Natural Earth cross-check 4.04 km

HOW THE TIME WAS CONVERTED

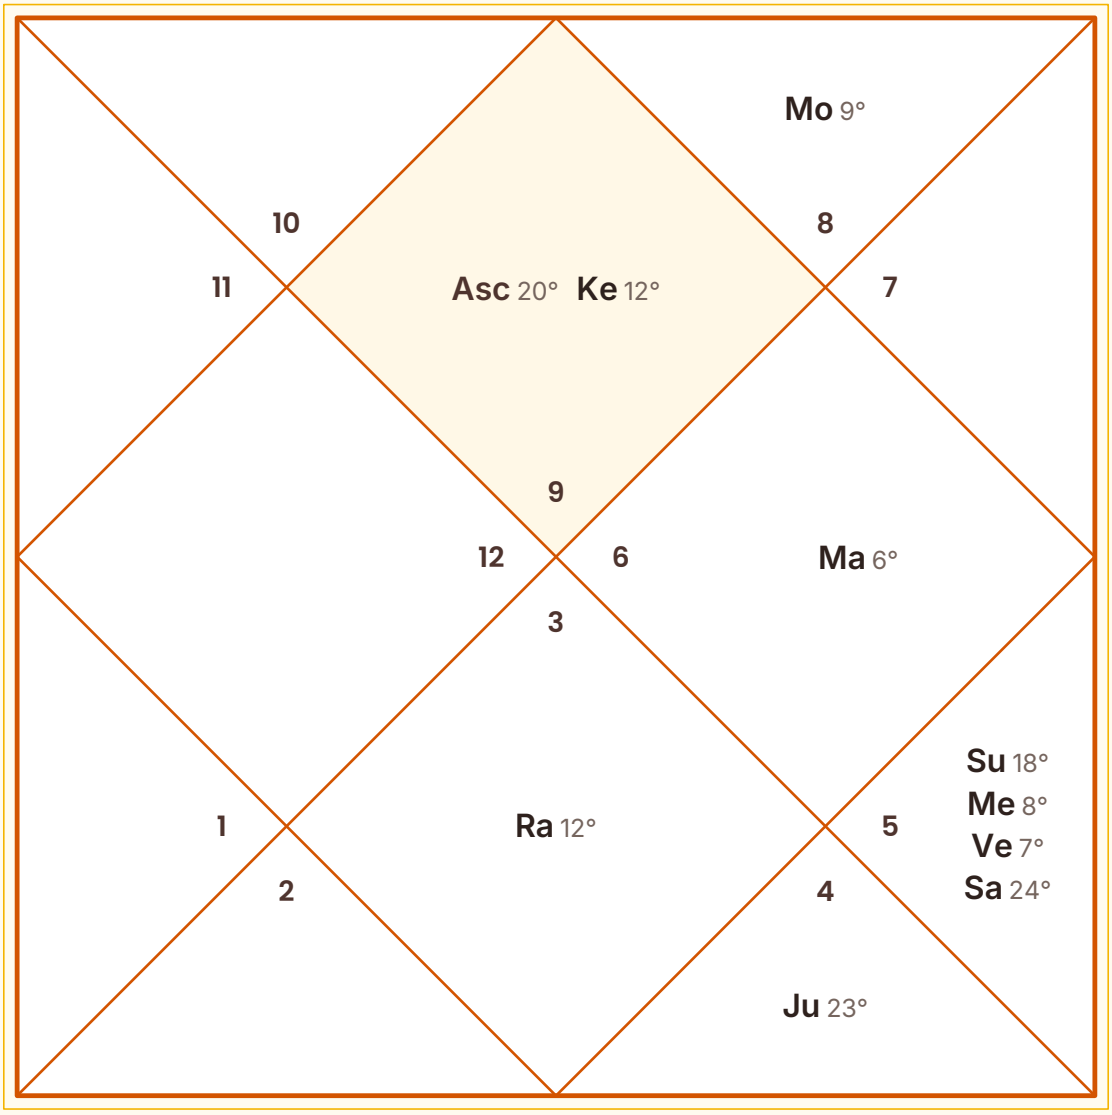

The local civil time is read in the IANA time zone Asia/Kolkata. The local time occurs once at this place, so exactly one UTC offset applies. No time, place or time zone is guessed: an unknown or impossible birth time is refused instead of being charted. Coordinates are the reference point of the chosen city.

Technical details of the method, data versions and validation status are on page 10.

SECTION 04

D1 Lagna chart

The birth chart in North Indian form. The top diamond is house 1, the Lagna; houses follow counter-clockwise. Numbers give the Rashi in each house.

LAGNA (ASC)	**Dhanu · 20°34′12″ within the Rashi · house 1 (shaded)**
ABBREVIATIONS	**Su** Sun **Mo** Moon **Ma** Mars **Me** Mercury **Ju** Jupiter **Ve** Venus **Sa** Saturn **Ra** Rahu **Ke** Ketu

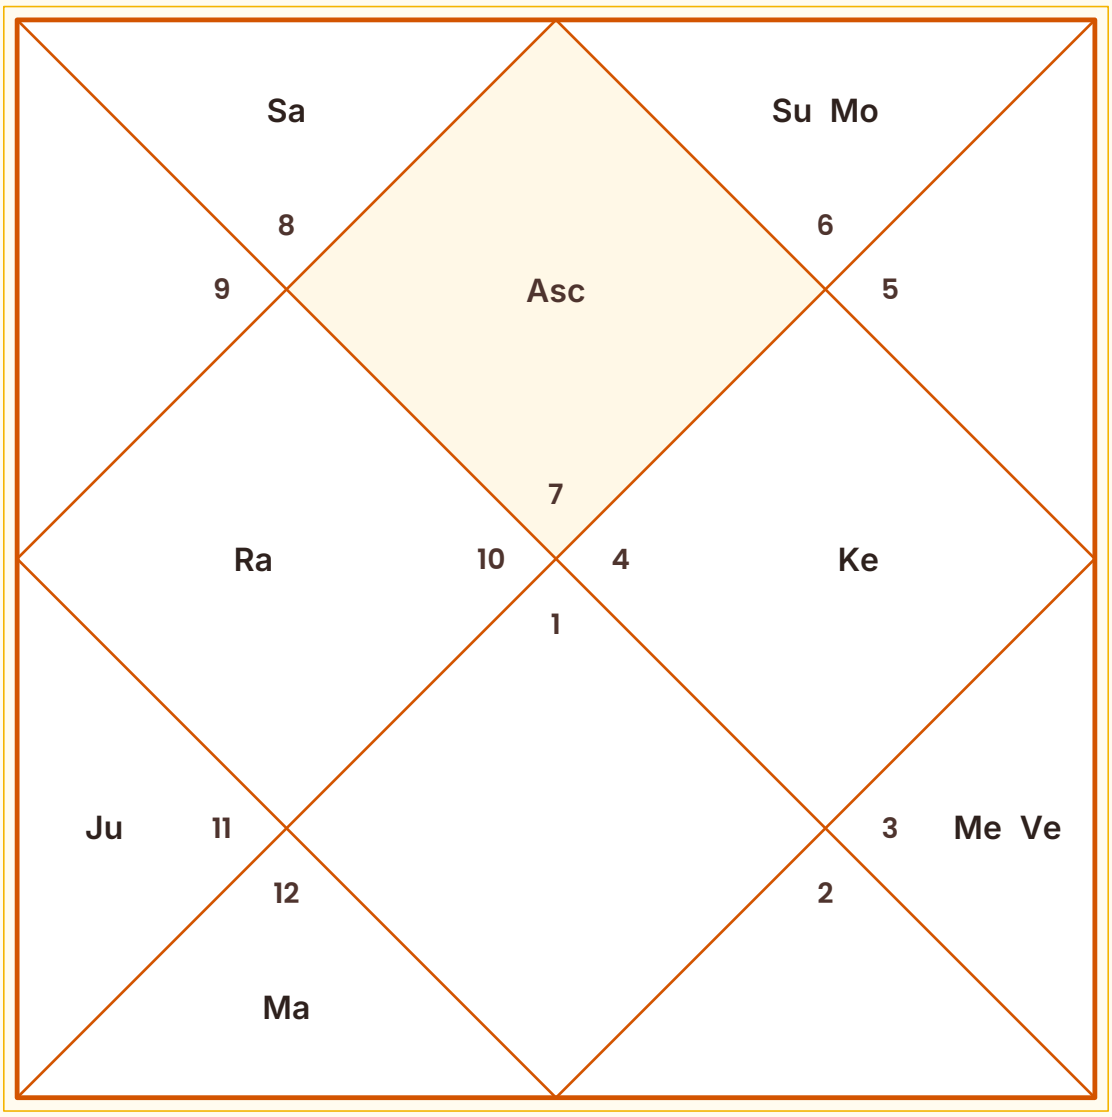

READING THIS CHART

Small figures beside each graha are whole degrees within its Rashi, truncated. Exact values, to the arc-second and as absolute longitude, are in Planetary positions on page 7. The Rashi and house of every graha are as calculated by the Sabpuja engine.

SECTION 05

D9 Navamsa chart

The Navamsa chart in the same North Indian form. House 1 is the D9 Lagna; every graha is placed in the D9 house reported by the engine.

D9 LAGNA (ASC)	**Tula · Rashi 7 · house 1 (shaded)**
ABBREVIATIONS	**Su** Sun **Mo** Moon **Ma** Mars **Me** Mercury **Ju** Jupiter **Ve** Venus **Sa** Saturn **Ra** Rahu **Ke** Ketu

READING THIS CHART

The D9 chart shows Navamsa Rashis and houses only; degrees are not shown because the engine reports D9 placements, not D9 longitudes. The table on page 8 lists the same placements, and each graha in this chart was checked against the engine D9 house list before drawing.

SECTION 06

Planetary positions

Each graha with its D1 Rashi, whole-sign house and position. The within-Rashi column is the readable form; the sidereal longitude is the engine value at its full printed precision.

GRAHA		D1 RASHI		HOUSE	WITHIN RASHI	SIDEREAL LONGITUDE
Asc	Lagna	9	Dhanu	1	20°34′12″	260.57026658°
Su	Sun	5	Simha	9	18°33′44″	138.56236668°
Mo	Moon	8	Vrischika	12	9°51′51″	219.86433548°
Ma	Mars	6	Kanya	10	6°48′30″	156.80851073°
Me	Mercury	5	Simha	9	8°17′40″	128.29445869°
Ju	Jupiter	4	Karka	8	23°46′57″	113.78253963°
Ve	Venus	5	Simha	9	7°15′20″	127.25577770°
Sa	Saturn	5	Simha	9	24°18′04″	144.30136151°
Ra	Rahu	3	Mithuna	7	12°34′27″	72.57432073°
Ke	Ketu	9	Dhanu	1	12°34′27″	252.57432073°

MOON NAKSHATRA AND PADA

Anuradha Pada 2

Nakshatra is reported by the engine for the Moon only, so it is not shown for other grahas.

NOTES ON THESE VALUES

Within-Rashi values are the sidereal longitude minus the start of the engine-reported Rashi, truncated to whole arc-seconds. Rahu is the mean lunar node; Ketu is exactly opposite the unrounded Rahu. Retrograde motion, dignity and strength are not calculated in this edition and are not shown.

SECTION 07

Navamsa placements

The D9 Rashi and D9 whole-sign house of each graha, as returned by the engine. The D1 Rashi is repeated for comparison.

GRAHA	D1 RASHI	D9 RASHI	D9 HOUSE
Asc Lagna	9 Dhanu	7 Tula	1
Su Sun	5 Simha	6 Kanya	12
Mo Moon	8 Vrischika	6 Kanya	12
Ma Mars	6 Kanya	12 Meena	6
Me Mercury	5 Simha	3 Mithuna	9
Ju Jupiter	4 Karka	11 Kumbha	5
Ve Venus	5 Simha	3 Mithuna	9
Sa Saturn	5 Simha	8 Vrischika	2
Ra Rahu	3 Mithuna	10 Makara	4
Ke Ketu	9 Dhanu	4 Karka	10

ABOUT THE D9 PLACEMENTS

The D9 Lagna is Tula, so D9 house 1 is Tula and the houses continue in Rashi order. Each graha's D9 Rashi and house in this table were checked against the engine D9 house list before the report was drawn. The chart on page 6 shows the same placements.

SECTION 08

Twelve-house directory

One row per house position. The D1 columns repeat the D1 chart and the D9 columns the D9 chart, so the Rashi and the grahas of any house can be read in one line.

HOUSE	D1 RASHI	D1 GRAHAS	D9 RASHI	D9 GRAHAS
1	9 Dhanu	**Asc Ke**	7 Tula	**Asc**
2	10 Makara	–	8 Vrischika	**Sa**
3	11 Kumbha	–	9 Dhanu	–
4	12 Meena	–	10 Makara	**Ra**
5	1 Mesha	–	11 Kumbha	**Ju**
6	2 Vrishabha	–	12 Meena	**Ma**
7	3 Mithuna	**Ra**	1 Mesha	–
8	4 Karka	**Ju**	2 Vrishabha	–
9	5 Simha	**Su Me Ve Sa**	3 Mithuna	**Me Ve**
10	6 Kanya	**Ma**	4 Karka	**Ke**
11	7 Tula	–	5 Simha	–
12	8 Vrischika	**Mo**	6 Kanya	**Su Mo**

READING KEY

House numbers count from each chart's own Lagna: D1 house 1 is the D1 Lagna Rashi and D9 house 1 the D9 Lagna Rashi, so the same house number usually holds different Rashis in the two charts. Each Rashi is shown with its number (1 Mesha to 12 Meena). A dash means no graha occupies that house. Abbreviations are listed on page 3. This directory describes placements only; it does not interpret them.

SECTION 09

Methodology and provenance

How the positions in this report were calculated, where the data comes from, and what the report does and does not claim.

Sidereal zodiac	Lahiri (Chitrapaksha), Swiss Ephemeris SE_SIDM_LAHIRI (mode 1), IAE 1985 definition, true ayanamsha, Swiss default precession; no SIDBIT options
Lunar nodes	Mean node for Rahu; Ketu exactly opposite the unrounded Rahu longitude.
Houses	Whole-sign houses for D1 and D9: house = Rashi count from the Lagna Rashi.
Precision	Absolute longitudes are printed to eight decimals. Positions within a Rashi are truncated to the arc-second. Rashi, Navamsa, Nakshatra, Pada and houses are classified from unrounded longitudes.
Ephemeris	Swiss Ephemeris 2.10.03 via pyswisseph 2.10.3.2, local files sepl_18.se1, semo_18.se1 (source commit c69c14adb7a0), checked by SHA-256 before calculation.
Time zones	IANA time zone database 2026e from tzdata 2026.5, checked by SHA-256.
Engine output	Chart schema 0.3.0; sabpuja-calculation-metadata/3.

> **VALIDATION STATUS: UNVERIFIED_GOLDEN_CHARTS**
> The engine's calculations are checked by its own conformance tests against Swiss Ephemeris. They have not yet been certified against an independent set of golden reference charts. Engine claim boundary: Swiss-on-Swiss integration conformance only; not independent astronomical validation, mathematical verification or historical clock verification.

Included in this report

- D1 Lagna and D9 Navamsa charts
- Sidereal longitudes of nine grahas and the Lagna
- D1 and D9 whole-sign houses
- Moon Nakshatra and Pada
- Birth time conversion and data provenance

Not included in this edition

- Panchanga, Vimshottari Dasha and other timing
- Other divisional charts, Yogas, Doshas and strengths
- Retrograde status and dignities
- Interpretations, predictions and remedies
- Hindi edition
